local2pdf.com

SEO / GEO / AEO Audit Report

FULL AUDIT

SEO	GEO	AEO
7/10	6/10	7/10
On Track	On Track	On Track

17 October 2026

Claude Skill and Plugin by Alex Labat

Executive Summary

Local2PDF already has the machinery of a serious tool site: unique titles, canonicals, a 31-URL sitemap, per-tool Open Graph images, and JSON-LD for the application, FAQs, how-to steps, and breadcrumbs. The urgent problem is a fact that answer engines will quote incorrectly. The live homepage says the free version supports up to 25 pages per conversion, while llms.txt and the image-to-PDF FAQ limit that cap to 25 images. Head-term URLs such as image-to-PDF, compress, and PDF-to-JPG are still too short to compete, and Firmify EOOD, named on About and in llms.txt, is missing from the Organization node. The blog URL returns 404, so there is no named author anywhere on the live site.

Dimension	Score	Status	Key takeaway
SEO	**7/10**	On Track	Strong technical base; thin head-term pages and short descriptions.
GEO	**6/10**	On Track	AI files are real, but the 25-page sentence can be cited as the product limit.
AEO	**7/10**	On Track	FAQ and HowTo markup exist; the featured-snippet answer for the limit is wrong.
Combined	**20/30**		

Pages Audited

Fetched on 17 October 2026 over HTTPS. Word counts are visible text after scripts and styles are removed.

URL	Type	Notes
/	Homepage	H1 present. FAQ answer still says 25 pages.
/pdf-tools	Tool directory	Full catalog. Title 69 characters.
/about	About	Names Firmify EOOD. 235 words. No person.
/contact	Contact	Three emails. No phone or street address.
/security	Trust	Local-processing claims and library names.
/compatibility	Support matrix	Browser table. 172 words.
/changelog	Freshness	Dated entries through 24 July 2026.
/privacy	Policy	Fetched. Short meta description, 89 characters.
/terms	Policy	Fetched. Title is only the template brand suffix.
/blog	Blog	404. Title falls back to the site default.
/sitemap.xml	Sitemap	Valid XML, 31 URLs, lastmod 24 July 2026.
/llms.txt	AI summary	Operator, price, 25-image cap, tool list.
/ai.txt	AI policy	Allows crawlers and names Firmify EOOD.
/robots.txt	Crawl rules	AI bots allowed. Sitemap declared.
/ads.txt	Ads	Placeholder publisher pub-XXXXXXXXXXXXXXXX.

/tools/image-to-pdf	Head tool	309 words. Badge says 25 pages; FAQ says 25 images.
/tools/compress-pdf	Head tool	320 words. Beta. HowTo and FAQ present.
/tools/merge-pdf	Head tool	433 words. Use cases and limitations.
/tools/split-pdf	Tool	379 words. Schema complete.
/tools/pdf-to-jpg	Head tool	285 words. Under a 300-word floor.
/tools/pdf-to-png	Tool	275 words.
/tools/pdf-to-text	Tool	287 words. States no OCR in the tool copy.
/tools/jpg-to-pdf	Format landing	585 words. Strongest format page.
/tools/png-to-pdf	Format landing	507 words.
/tools/webp-to-pdf	Format landing	466 words.
/tools/heic-to-pdf	Format landing	497 words.
/tools/photos-to-pdf	Format landing	516 words.
/tools/screenshot-to-pdf	Format landing	492 words.
/tools/combine-images-to-pdf	Format landing	241 words. Thinnest indexable tool.
/tools/rotate-pdf	Tool	345 words.
/tools/reorder-pdf-pages	Tool	377 words.
/tools/delete-pdf-pages	Tool	300 words.
/tools/extract-pdf-pages	Tool	479 words.
/tools/add-page-numbers-to-pdf	Tool	279 words.
/tools/crop-pdf	Tool	318 words. Meta description 104 characters.
/tools/resize-pdf-pages	Tool	250 words.
/tools/n-up-pdf	Tool	322 words.
/tools/extract-images-from-pdf	Beta	noindex. Correctly kept out of the sitemap.

SEO Analysis

Score: 7/10. The indexable catalog is technically consistent. Content depth and a few metadata lengths are the gap.

Technical On-Page

Signal	Finding	Status
Title tags	Unique, keyworded titles on every indexable URL. Homepage is 47 characters. Many tool titles exceed 60 once the "| Local2PDF" suffix is added; /pdf-tools is 69.	Needs Attention
Meta descriptions	Present and unique. Homepage is 138 characters. Compress is 91, crop is 104, privacy is 89, security is 113. Several miss the 150-160 range and have no explicit next step.	Needs Attention
H1	One H1 on every 200 page checked, including Security and Changelog. The 404 uses "Page not found".	Good

URLs	Readable keyword paths such as /tools/merge-pdf and /tools/pdf-to-jpg. No parameter URLs.	Good
Canonicals	Self-referencing canonicals on indexable pages. The 404 has none, which is appropriate with noindex.	Good
Robots	Global index, follow. extract-images-from-pdf is noindex and is absent from the sitemap.	Good
Viewport	width=device-width is present in the document head.	Good
Open Graph	Tool pages point at dedicated /og/{slug}.png files. Homepage and trust pages still share /og-image.png.	Needs Attention
Internal links	Header, footer, tool grids, and related-tool lines connect the catalog. Anchors are the tool names.	Good
Image alt	OG images carry alt text. The interface is mostly text and SVG, not a gallery of content images.	Good

Content Quality

Signal	Finding	Status
Word count	Head terms are still thin on the live site: image-to-pdf 309 words, compress-pdf 320, pdf-to-jpg 285, pdf-to-png 275, pdf-to-text 287. combine-images-to-pdf is 241. JPG/PNG/HEIC/photos landings are 466-585.	Needs Attention
Keyword focus	Each tool URL targets one job (merge, split, HEIC, compress) and repeats the private/no-upload modifier.	Good
Freshness	Changelog lists 22-24 July 2026. Sitemap lastmod is 24 July 2026. Blog, which would show newer dates, 404s.	Needs Attention
Readability	Short paragraphs, numbered steps, FAQ disclosures, and use-case lists on the stronger tool pages.	Good

Structured Data

Signal	Finding	Status
Organization + WebSite	Homepage JSON-LD names Local2PDF, logo, email, and sameAs for GitHub and Product Hunt. parentOrganization Firmify EOOD is not in the live markup.	Needs Attention
WebApplication	Every tool emits WebApplication with a free Offer. Image-to-PDF also has an @id.	Good
FAQPage	Homepage and tool pages include FAQPage. The homepage answer still says the free version supports 25 pages.	Needs Attention
HowTo + Breadcrumb	Tool pages include HowTo steps and a Home / PDF Tools / Tool breadcrumb. No visible breadcrumb UI was required for the markup to be present.	Good
Sitemap	https://local2pdf.com/sitemap.xml returned valid XML with 31 URLs. Blog URLs are not in it.	Good

GEO Analysis

Score: 6/10. Generative engines can already find a clean entity and an allow-list. They can also cite the wrong usage cap.

E-E-A-T Assessment

Signal	Finding	Status
Named author	No person is named on About, blog, or articles. /blog returns 404.	Missing
Operator	About, llms.txt, and ai.txt name Firmify EOOD in Bulgaria. The Organization node on the homepage does not.	Needs Attention
Contact	support@, privacy@, and security@ are on /contact. No phone number or street address.	Needs Attention
Trust copy	Security page names jsPDF and pdf-lib, tells users to check the Network tab, and separates ads from file bytes. No testimonials, awards, or press quotes.	Needs Attention
SameAs	GitHub and Product Hunt are in schema. No other profiles.	Needs Attention

Content for AI Synthesis

Signal	Finding	Status
Factual density	llms.txt states price, the 25-image cap, formats, and four limitations. Security states what is and is not sent.	Good
Conflicting fact	Homepage FAQ: "The free version supports up to 25 pages per conversion." Image-to-PDF badge: "Free: up to 25 pages per conversion." Same page FAQ and llms.txt say 25 images, and only for image conversion.	Missing
Clear claim	Hero states private, no upload, no account, no watermark above the tool grid.	Good
External citations	Security names libraries but does not link to their docs. No third-party study or benchmark.	Needs Attention
Entity clarity	The brand string Local2PDF is consistent. The legal operator is easy to miss if a model only reads JSON-LD.	Needs Attention

Technical GEO

Signal	Finding	Status
AI crawlers	robots.txt allows GPTBot, OAI-SearchBot, ChatGPT-User, Google-Extended, PerplexityBot, anthropic-ai, and CCBot.	Good
llms.txt and ai.txt	Both are live. ai.txt points models at About, Security, Privacy, and the tool directory.	Good
HTTPS	The audited URLs were fetched over HTTPS.	Good
Crawlability	Primary copy, FAQ, and JSON-LD are in the initial HTML, not hidden behind a client-only render.	Good

Speakable / Author schema	No SpeakableSpecification and no Person author node.	**Missing**

AEO Analysis

Score: 7/10. The site is built to answer questions. One of those answers disagrees with the others.

Featured Snippet Eligibility

Signal	Finding	Status
Direct answers	FAQ answers are short enough to quote. The homepage limit answer is the wrong fact.	**Needs Attention**
Definition	About opens with "Local2PDF is a privacy-first PDF toolkit..." which is a citable definition.	**Good**
Lists	How-it-works steps and limitation bullets can become list snippets.	**Good**
Tables	Compatibility has a Chrome/Firefox/Safari/Edge matrix. Tool pages have no comparison table.	**Needs Attention**

Structured Answer Formats

Signal	Finding	Status
FAQ schema	Present on the homepage and on tool layouts, with Question and Answer nodes.	**Good**
HowTo schema	Present on tool pages, aligned to the visible step lists.	**Good**
Question headings	FAQs are questions. Section headings are mostly "How to merge PDF files", not "How do I merge a PDF?".	**Needs Attention**
Speakable	No SpeakableSpecification.	**Missing**

Voice Search Readiness

Signal	Finding	Status
Conversational copy	Answers use plain "No. All image processing happens entirely in your browser."	**Good**
Long-tail coverage	Tools cover HEIC, screenshots, n-up, page numbers, and text extraction, each on its own URL.	**Good**
Local NAP	Not a local-service business. Country is Bulgaria via the operator, with email only.	**Needs Attention**

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact

Critical	Correct the live 25-page claim	GEO	Low	High
High	Expand head-term tool pages past 500 words	SEO	Medium	High
High	Publish Firmify EOOD in Organization schema and ship the blog	GEO	Medium	High
Medium	Rewrite short meta descriptions and trim titles over 60 characters	SEO	Low	Medium
Medium	Replace the ads.txt placeholder publisher ID	SEO	Low	Medium
Quick Win	Add question-form H2s above the existing FAQ answers	AEO	Low	Medium
Quick Win	Point the homepage OG image at a toolkit image, not only the shared file	SEO	Low	Low

The 25-page sentence appears in the homepage FAQ JSON-LD and in the image-to-PDF badge ("Free: up to 25 pages per conversion"). llms.txt says: "Image-to-PDF limit: Up to 25 images per conversion. PDF tools have device-dependent limits." Ship one sentence everywhere.

Core Web Vitals, backlinks, and rendered mobile layout were not measured. Use PageSpeed Insights at pagespeed.web.dev for field and lab speed.

What's Working Well

Strength	Evidence from the crawl
Crawl policy	robots.txt explicitly allows the major AI crawlers and points at the sitemap.
Tool schema	Indexable tools ship WebApplication, FAQPage, HowTo, and BreadcrumbList together.
Canonicals	Each tool has an absolute canonical on https://local2pdf.com.
OG files	Tool pages reference a matching /og/{slug}.png rather than one shared image.
Machine summary	llms.txt states the operator, the free price, the image cap, and the no-OCR limit.
Beta handling	extract-images-from-pdf is noindex and is not in the 31-URL sitemap.
Verifiable privacy	The security page tells a reader to confirm the claim in the Network panel.

Glossary

SEO

Search Engine Optimization. The work that helps a page get listed and clicked in a conventional search result: titles, descriptions, headings, links, sitemaps, and structured data.

GEO

Generative Engine Optimization. The work that helps an AI answer engine such as Perplexity, ChatGPT search, or Google AI Overviews quote and cite the page. It rewards a clear entity, consistent facts, and sources a model can name.

AEO

Answer Engine Optimization. The work that helps a search result lift a direct answer, a list, or a table into a featured snippet, a People Also Ask box, or a spoken reply.
