SEO / GEO / AEO Audit Report

SEO	GEO	AEO
9	**10**	**10**
Strong	*Strong*	*Strong*

17 October 2026

Claude Skill and Plugin by Alex Labat

Executive Summary

Local2PDF is a privacy-first PDF toolkit, and this crawl of the live site is the first pass that moves a score. SEO stays 9/10. GEO moves from 9 to 10, and AEO moves from 9 to 10. Combined score: 29/30, up 2 from the v5 full audit earlier on 17 October 2026. The three items that held every score at 9 are fixed on the live HTML: Security and Privacy now say display advertising is off, matching the homepage FAQ and ads.txt; indexable meta descriptions are all 150–160 characters; Compatibility no longer titles itself Local2PDF | Local2PDF. SEO does not reach 10 because two indexable titles are still short of 50 characters and the blog index is 289 words.

Dimension	Score	Status	Key Takeaway
SEO	**9/10**	Strong	Descriptions, headings, and blog schema are fixed. Two titles and a thin blog index keep this at 9.
GEO	**10/10**	Strong	Ads wording, author pages, contact emails, and library citations now agree across the site.
AEO	**10/10**	Strong	Compatibility has two snippet tables. Tools are speakable. Posts answer a question in 48–53 words.
Combined	**29/30**	Strong	Up 2 from the v5 full audit earlier on 17 October 2026 (27/30).

Score difference versus the prior full audit

The baseline is the v5 full audit of local2pdf.com on 17 October 2026, which scored 9 / 9 / 9. This crawl used the same 1–10 rubric on the live HTML. A dimension moves when the signals that held it below 10 are no longer present. A 10 means the category has no Missing or Needs Attention signal left. An 8 or 9 means the foundation is strong and a specific refinement is still available.

Dimension	v5	Now	Change	Why it moved
SEO	9/10	9/10	**0**	Score held. The old blockers are gone; two short titles remain.
GEO	9/10	10/10	**+1**	Security, Privacy, and the homepage now use the same ads-off sentence.
AEO	9/10	10/10	**+1**	The missing comparison table and tool-level Speakable markup are live.
Combined	27/30	29/30	**+2**	Baseline is the v5 full audit from earlier on 17 October 2026.

Earlier the same day the live site scored 7/6/7, then 8/7/8, then 8/8/8, then 9/9/9. This pass is 9/10/10.

Pages Audited

42 live URLs returned HTTP 200. Word counts are visible text after scripts and styles are removed. A markdown fetcher returned 500 once for sitemap.xml; a direct fetch of the same URL returned the sitemap.

URL	Page type	Notes
https://local2pdf.com/	Homepage	715 words. Title 51. FAQ questions are H3s. Speakable on the 25-image answer.
https://local2pdf.com/pdf-tools	Directory	612 words. Title 54. Description 157. Tool groups with internal links.
https://local2pdf.com/tools/image-to-pdf	Tool	640 words. Title 54. FAQ, HowTo, Speakable. 25-image cap stated.
https://local2pdf.com/tools/jpg-to-pdf	Tool	588 words. Title 51. Description 156.
https://local2pdf.com/tools/png-to-pdf	Tool	510 words. Title 51. Description 155.
https://local2pdf.com/tools/webp-to-pdf	Tool	660 words. Title 52. Description 160.
https://local2pdf.com/tools/heic-to-pdf	Tool	723 words. Title 52. Description 150.
https://local2pdf.com/tools/combine-images-to-pdf	Tool	547 words. Duplicate How-do-I heading is gone.
https://local2pdf.com/tools/photos-to-pdf	Tool	522 words. Title 54. Description 153.
https://local2pdf.com/tools/screenshot-to-pdf	Tool	703 words. Title 58. Description 156.
https://local2pdf.com/tools/merge-pdf	Tool	671 words. Title 50. Description 158. Speakable on the main FAQ.
https://local2pdf.com/tools/split-pdf	Tool	608 words. Title 51. Description 155.
https://local2pdf.com/tools/rotate-pdf	Tool	553 words. Title 57. Description 154.
https://local2pdf.com/tools/reorder-pdf-pages	Tool	594 words. Decoded title 57. Description 158.
https://local2pdf.com/tools/delete-pdf-pages	Tool	535 words. Title 56. Description 156.
https://local2pdf.com/tools/extract-pdf-pages	Tool	720 words. Title 58. Description 153.
https://local2pdf.com/tools/pdf-to-jpg	Tool	537 words. Title 56. Description 152.
https://local2pdf.com/tools/pdf-to-png	Tool	529 words. Title 48 characters, two short of the 50–60 band.
https://local2pdf.com/tools/pdf-to-text	Tool	541 words. Title 51. Description 157.
https://local2pdf.com/tools/add-page-numbers-to-pdf	Tool	681 words. Title 54. Description 156.
https://local2pdf.com/tools/crop-pdf	Tool	515 words. Title 54. Description 155.
https://local2pdf.com/tools/resize-pdf-pages	Tool	531 words. Title 57. Description 154.
https://local2pdf.com/tools/n-up-pdf	Tool	518 words. Title 55. Description 152.
https://local2pdf.com/tools/compress-pdf	Tool	585 words. Title 51. Description 155.
https://local2pdf.com/tools/extract-images-from-pdf	Beta tool	252 words. noindex. Not in the sitemap. Title 45, description 123.

URL	Page type	Notes
https://local2pdf.com/about	About	540 words. Firmify EOOD, UIC 208745197, Atanas Ignatov. Links to pdf-lib and PDF.js.
https://local2pdf.com/blog	Blog index	289 words. Blog, Person, BlogPosting, and ItemList schema.
https://local2pdf.com/blog/image-to-pdf-limit	Article	710 words. Question H2s. First answer is 53 words. Title 59.
https://local2pdf.com/blog/how-local2pdf-processes-files	Article	726 words. First answer is 48 words. Links PDF.js and pdf-lib.
https://local2pdf.com/blog/when-to-compress-a-pdf-locally	Article	665 words. Question H2s. Title is 42 characters.
https://local2pdf.com/contact	Contact	202 words. Visible support@, privacy@, and security@ addresses.
https://local2pdf.com/security	Security	546 words. Ads-off wording matches the homepage and ads.txt.
https://local2pdf.com/compatibility	Compatibility	473 words. Title 55. Two HTML comparison tables. No doubled brand.
https://local2pdf.com/changelog	Changelog	209 words. Newest heading is October 17, 2026. Title 51.
https://local2pdf.com/privacy	Legal	517 words. Ads-off section. Title is the conventional 26-character legal title.
https://local2pdf.com/terms	Legal	523 words. Title is the conventional 24-character legal title.
https://local2pdf.com/robots.txt	Crawl policy	Allows GPTBot, OAI-SearchBot, PerplexityBot, Google-Extended, anthropic-ai, CCBot, and *.
https://local2pdf.com/sitemap.xml	Sitemap	200 on a direct fetch. 35 indexable URLs. lastmod 2026-10-17.
https://local2pdf.com/llms.txt	AI summary	Names Firmify EOOD, the 25-image cap, and the preferred pages.
https://local2pdf.com/llms-full.txt	AI full text	Libraries, browser floors, and the same operator facts.
https://local2pdf.com/ai.txt	AI policy	Allow all. Preferred citations: About, Security, Privacy, PDF tools.
https://local2pdf.com/ads.txt	Ads policy	No publisher record. Comment says display ads are off.

SEO Analysis

Score: 9/10 — Strong. Unchanged from v5. The description-length problem, the doubled Compatibility title, the repeated combine-images heading, and the blog index schema are fixed. Two titles and a short blog index are why this is not a 10.

Technical On-Page

Signal	Finding	Status
Title tags	Every HTML page has one title, and the doubled “Local2PDF | Local2PDF” Compatibility title is gone. It now reads “Check Browser Support for Private PDF Tools | Local2PDF” (55). Homepage is 51 (“Private PDF Tools — Free, No Upload, On Your Device”). Two indexable titles sit under 50: PDF to PNG at 48, and “When to compress a PDF locally | Local2PDF” at 42. Privacy (26) and Terms (24) are short legal titles on purpose.	Needs Attention
Meta descriptions	Present on all 36 HTML pages. Every indexable description is 150–160 characters, including the eight tools that were 124–132 in v5 and the homepage and limit article that were over 160. The noindex beta tool is 123 and is outside the indexable set.	Good
Heading hierarchy	Each HTML page has a single H1. The repeated “How do I combine images into one PDF?” heading is gone. The three posts now have question H2s. Homepage FAQ questions render as H3s under “Frequently asked questions”.	Good
URL structure	Readable keyword paths such as /tools/merge-pdf and /blog/when-to-compress-a-pdf-locally. No tracking parameters.	Good
Canonical	Self-referencing https://local2pdf.com URLs on every HTML page, including the homepage.	Good
Robots meta	index, follow on the indexable set. /tools/extract-images-from-pdf is noindex and is not in the sitemap.	Good
Viewport	A viewport meta tag is present on the HTML pages.	Good
Image alt text	The homepage and image-to-PDF each expose two images, both with alt text. Other pages are text and have no content images.	Good
Internal links	Tool pages link to related tools. /pdf-tools groups the catalog. The blog index links to three posts. About links the operator, the libraries, and the blog.	Good
Open Graph and Twitter	og:title, og:description, og:image, and twitter:card are present on the HTML pages. Tool pages use /og/{slug}.png.	Good

Content Quality

Signal	Finding	Status
Word count	Core tools and the three posts clear 500 words (image-to-PDF 640, merge 671, limit article 710, processing article 726). About is 540 and Security is 546, both up from about 320. Compatibility is 473, the blog index 289, Contact 202, and Changelog 209.	Needs Attention
Keyword signals	Titles, H1s, and opening lines name the tool and the private, no-upload constraint. Format pages keep distinct intents.	Good
Freshness	The three posts carry 2026-10-17. The changelog’s newest heading is October 17, 2026. Sitemap lastmod matches that date.	Good
Readability	Tool pages scan as steps, limitations, and FAQs. The posts now break into question H2s with a direct answer under the first one.	Good

Structured Data

Signal	Finding	Status
Schema types	Organization, WebSite, WebPage, WebApplication, Offer, FAQPage, HowTo, BreadcrumbList, Blog, BlogPosting, Person, ItemList, and SpeakableSpecification. JSON-LD on the fetched pages parsed.	Good
Organization completeness	Local2PDF declares a logo, support@local2pdf.com, parentOrganization Firmify EOOD, addressCountry BG, and sameAs links to GitHub and Product Hunt. There is no street address or telephone, which fits a browser tool.	Good
Tool entities	Indexable tools include WebApplication with an Offer, plus FAQPage, HowTo, BreadcrumbList, and SpeakableSpecification.	Good
Article entities	Each post is a BlogPosting with a Person author. The blog index now also has Blog, Person, BlogPosting, and ItemList. In v5 the index had Organization and WebSite only.	Good

GEO Analysis

Score: 10/10 — Strong. Up from 9/10 in v5. GEO is how AI answer engines decide what to cite. The advertising contradiction is gone, About and Security are long enough to cite, and the library claims point at the projects themselves.

E-E-A-T Assessment

Signal	Finding	Status
Author	Posts and About name Atanas Ignatov, Manager of Firmify EOOD, with a Person node. The processing article byline repeats that role and links About.	Good
About page	540 words. States Firmify EOOD is a Bulgarian company, UIC 208745197, and that it also publishes Firmify and StoryKind, with links to firmify.bg and storykind.tech.	Good
Contact	Visible sections for Support, Privacy, Security, and Bug Reports, with support@, privacy@, and security@local2pdf.com. No phone and no street address. That is the right contact set for this product.	Good
Trust signals	sameAs points to the GitHub repo and the Product Hunt listing. The crawled pages do not invent a testimonial. Leaving a quote out is correct when no published quote was provided.	Good
Advertising claim	Homepage FAQ, Security, Privacy, the processing article, the changelog, and ads.txt all say display advertising is currently off and that ads.txt lists no authorized sellers. The v5 line “This site may display advertisements” is gone.	Good

Content for AI Synthesis

Signal	Finding	Status
Factual density	Citable facts include the 25-image cap, device-dependent PDF limits, Chrome/Firefox/Edge 90+, Safari 15+, Firmify UIC 208745197, and the library list.	Good

Signal	Finding	Status
Clear claim	The homepage H1 and the first paragraph say files are processed in the browser with no uploads, no account, and no watermark.	Good
External citations	About, Security, and the processing article link https://mozilla.github.io/pdf.js/ and https://pdf-lib.js.org/. About also links Firmify and StoryKind.	Good
Entity clarity	Local2PDF, Firmify EOOD, and Atanas Ignatov are named the same way in About, the posts, llms.txt, and ai.txt.	Good
Originality	The processing article tells readers to confirm local handling in the browser Network tab. Security repeats that check and says an ad-seller request should be absent.	Good
Limit consistency	“25 images” is the cap on the badge, the FAQ, llms.txt, and the limit article. “25 pages” is used to say crop, PDF-to-PNG, compress, and combine are not capped at 25 pages.	Good

Technical GEO

Signal	Finding	Status
AI discovery files	llms.txt, llms-full.txt, and ai.txt all return 200. ai.txt names the operator, the author, and four preferred citation URLs.	Good
Crawler policy	robots.txt allows OAI-SearchBot, ChatGPT-User, GPTBot, Google-Extended, PerplexityBot, anthropic-ai, CCBot, and *. The sitemap line is present.	Good
HTTPS	Every fetched URL was served over HTTPS.	Good
sameAs	Organization.sameAs includes https://github.com/azsumnasko/img2pdf and https://www.producthunt.com/products/local2pdf.	Good
Sitemap	sitemap.xml returned 200 with 35 indexable routes and lastmod 2026-10-17. The beta extract-images URL is excluded.	Good

AEO Analysis

Score: 10/10 — Strong. Up from 9/10 in v5. AEO is how a page gets lifted into a snippet or a spoken answer. The missing table, the homepage FAQ headings, the post question headings, and tool-level Speakable markup are all on the live pages.

Featured Snippet Eligibility

Signal	Finding	Status
Direct answer	The limit article answers “What is the Local2PDF image limit?” in 53 words. The processing article answers its first question in 48 words. The compress article answers in 50 words. The target band is 40–60.	Good
Definition pattern	llms.txt opens with “Local2PDF is a privacy-first PDF toolkit.” About repeats that sentence and names the operator.	Good

Signal	Finding	Status
List content	The homepage “How do I use Local2PDF?” block is four numbered steps. Tool pages repeat select, adjust, download.	Good
Table content	Compatibility has two HTML tables. One lists browser, minimum version, HEIC decode, and offline support for Chrome, Firefox, Safari, Edge, Mobile Safari, and Mobile Chrome. The second lists File API, Canvas, WebAssembly, and Web Workers as Supported on Chrome 90+, Firefox 90+, Safari 15+, and Edge 90+.	Good

Structured Answer Formats

Signal	Finding	Status
FAQ schema	FAQPage with Question and Answer is on the homepage and on the tool pages, including the noindex beta tool.	Good
HowTo schema	HowTo and HowToStep are on the homepage and the tool pages.	Good
Question headings	Tool H2s use “How do I…?”. Homepage FAQ questions are H3s. Each post has two or three question H2s, including “How does Local2PDF process a file?” and “When should I compress a PDF locally?”.	Good
Speakable schema	SpeakableSpecification is on the homepage (#faq-image-limit-answer) and on every tool page (#faq-primary-answer). The three posts do not have Speakable markup. That is a refinement, and it does not remove the tool and homepage coverage that was missing in v5.	Good

Voice Search Readiness

Signal	Finding	Status
Conversational language	Answers use plain second-person lines: no account, no watermark, files stay on the device.	Good
Long-tail coverage	Dedicated pages answer JPG vs PNG vs WebP vs HEIC, the 25-image cap, when to compress, and how local processing works.	Good
Local signals	This is a software product, not a storefront. Schema has addressCountry BG and email. There is no phone or street, which fits the product.	Good

Priority Recommendations

Nothing here is severe enough to pull a score down from the 9–10 band. These are the remaining refinements. The first one is what still separates SEO from a 10.

Priority	Issue	Dimension	Effort	Impact
Quick Win	Lengthen two titles into 50–60 characters: PDF to PNG is 48 (“PDF to PNG Locally — Lossless Export | Local2PDF”) and the compress article is 42 (“When to compress a PDF locally | Local2PDF”).	SEO	Low	Medium

Priority	Issue	Dimension	Effort	Impact
Quick Win	Add a defining intro on the blog index. It is 289 words and mostly a list of three posts.	SEO	Low	Low
Medium	Add one short paragraph of already-published browser facts on Compatibility. The page is 473 words, just under a 500-word content page.	SEO	Low	Low
Medium	Add SpeakableSpecification to the three posts. Tools and the homepage already have it.	AEO	Low	Low

What's Working Well

Strength	Evidence from this crawl
Ads claim is consistent	Security, Privacy, the homepage FAQ, the processing article, and ads.txt all say display advertising is off. v5 still had “This site may display advertisements” on Security.
Descriptions are in range	All 35 indexable HTML descriptions measure 150–160 characters. v5 had eight tools at 124–132 and two pages over 160.
Compatibility is citable	Title is 55 characters with a single brand. Two tables cover browser floors and the File API, Canvas, WebAssembly, and Web Workers.
Answers are extractable	Each post opens a question H2 and answers it in 48–53 words. Tool FAQs carry SpeakableSpecification.
The entity is stable	Firmify EOOD, UIC 208745197, and Atanas Ignatov appear on About, the posts, llms.txt, and ai.txt, with links to PDF.js and pdf-lib.
AI crawlers are invited	robots.txt allows the major AI user agents. llms.txt, llms-full.txt, and ai.txt return 200 and name the pages to cite.

The green rows above are observations from the 17 October 2026 live crawl. They are not a ranking guarantee.

What this audit did not measure

Core Web Vitals, rendered layout, and lab performance need a PageSpeed Insights run at pagespeed.web.dev. Backlinks, rankings, and Search Console coverage are outside an HTML crawl. JavaScript-only text is not a concern here: the fetched HTML already contains the headings, tables, FAQs, and JSON-LD.

Glossary

SEO is traditional search optimization: titles, descriptions, headings, links, and structured data that help a page get crawled and ranked.

GEO is generative engine optimization: writing and marking up pages so AI answer engines such as ChatGPT Search, Perplexity, Gemini, and Google AI Overviews can cite them.

AEO is answer engine optimization: shaping a page so a featured snippet, a People Also Ask box, or a voice assistant can lift one direct answer.
